

Traffic Gate

The A-SAFE Traffic Gate offers versatile protection across various applications such as goods in/out access and loading bay protection.

It has been designed with ease of use in mind by utilizing a gas-assisted mechanism that ensures the weight of the rail is always supported. When in a closed position, the rail is secured by a pin to ensure maximum stability and durability during impacts.

Available in 3 different sizes to suit a range of workplace applications.

MEMAPLEX™

Ultimate Strength Polymer

created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled strength and flexibility.

Advanced Engineering

Molecular reorientation during manufacturing creates a unique built-in memory that enables the Traffic Gate to fully recover following impacts.

Revolutionary 3-Layered Material

- Inner strengthening core
- Central impact absorption zone
- Outer UV stabilised colour layer

Suitability

Vehicle

Manual pallet truck

Electric pedestrian truck

Electric pedestrian stacker

Electric high reach truck

Horizontal order picker

Lightweight counterbalance FLT

Very narrow aisle FLT

Heavy duty counterbalance FLT

Engine counterbalance heavy duty FLT

Frame roll container

Application

Goods In/Out

Suitable for heavier vehicles

Pedestrian Segregation

Traffic Segregation

Traffic and Pedestrian Segregation

*Non-standard Stainless Steel variant is available upon request, with an extended lead time.

The Traffic Gate provides a huge return on investment from incident prevention and downtime avoidance as vehicles and floors do not need replacing or repair after impacts.

Features and benefits

Large operating handles make the gate easy to lift and close.

The gas-assisted lift is designed to ensure a wide range of employees can lift the rails.

The positive lock feature ensures the gate can be lifted and locked securely into position.

Self coloured and UV stabilised for continued visibility and long lasting aesthetics with no repainting.

Food safe, wipe-clean, water resistant surface.

Advanced strength polymer, expertly blended for unequalled strength and flexibility.

Zinc nickel, electrophoretic coating on base plates as standard, provides advanced protection.

Optional Sign Caps can be applied to the gate posts to provide additional health and safety messages.

Technical Information

How the energy from a vehicle impact is calculated

$\frac{1}{2} \text{ Mass} \times \text{Speed}^2 = \text{Joules}$

Tested Impact Energy

14,000 Joules

3.6 Ton vehicle and speed

Mid Rail 90° Impact on
78% inch Post Centres

Deflection at Max Energy - 21% inches
78% inch opening

Base (All variants)

Material Properties	MEMAPLEX™
Temperature Range	14°F to 122°F
Ignition Temperature	698°F to 734°F
Flash Point	662°F to 698°F
Toxicity	Not Hazardous
Chemical Resistance	Excellent - ISO/TR 10358
Weathering Stability (Grey Scale)	5/5*
Light Stability (Blue Wool Scale)	7/8**
Static Rating (Surface Resistivity)	10 ¹⁵ - 10 ¹⁶ Ω

* Weathering scale 1 is very poor and 5 is excellent

** Light stability scale 1 is very poor and 8 is excellent

Post Options
